SECTION 10 - JUDGING PROCEDURES

A) CONFORMATION

In general, the Tennessee Walking Horse has an intelligent looking, neat head; well-shaped, pointed ears; clear, alert eyes; tapered muzzle. The horse should have a graceful neck with sloping, muscular shoulders. The back should be short with good coupling at the loins. A wide chest in good proportion accompanies a well-ribbed body and deep girth. The croup should generally slope with muscled hips. Muscular development extends down toward the hock with legs flat and corded.

B) GAITS

1) FLAT WALK:

The flat walk is a bold, distinct, ground covering gait that must be even, four cornered and four-beat. Each foot strikes the ground independently with the forelegs moving straight in an elevated arc accompanied by a pronounced vertical head shake. The footfall sequence must be left hind, left front, right hind, and right front. The horse should appear to pull with his front legs and drive from his rear legs. The rear legs should track straight and follow through close to the ground. The action of the back foot stepping over the front track is known as over stride and is to be preferred over simple tracking up. Horses displaying lameness, hesitation, unevenness, stiff-legs, or wringing hocks must be eliminated. A walking horse shakes its head in rhythm with the cadence of the hooves. Head shake, which should be down to up, along with over stride, are major factors to be considered when tying a walking horse class.

2) RUNNING WALK:

The running walk is an extension of the flat walk, with a distinct difference in speed. Form should not be sacrificed for speed. Wringing hocks and/or stiff-legged rear legs are deviations of the true running walk and should be penalized. Any appearance of laboring at this gait should be penalized. The horse's head should continue to shake while executing the running walk. Some examples of the breed may also flop their ears or to click their teeth in rhythm with the gait. These peculiarities should not be penalized unless it appears that they are derived from either discomfort or improper biting. 3) CANTER/LOPE:

The canter/lope should be smooth, straight and collected on both leads, not walking behind, but cantering/loping on both ends with a 3-beat, rolling "rocking chair" motion. Pumping of the reins must be severely penalized. A horse must canter/lope on the correct lead for the direction he is going without cross cantering. Unruly, out of control canter/lope horse must be excused.

4) TRAIL WALK:

The trail walk is a true walk with a light rein and no appearance of strain on the part of the horse or rider. The appearance should be that of a pleasure riding horse that is relaxed, content and manageable.

C) GENERAL

1) The horse should move freely at each gait and proceed in a smooth, fluid, rhythmic manner.

2) At **all** these gaits the horse should be flexed at the poll with the muzzle slightly tucked, but not vertical or over bent.

3) Stiff front and/or rear leg motion, stumbling, buckling knees, lack of rhythmic timing or favoring of any leg, excessive bumping or pumping of the horse **at any gait** or **the** tendency to pace, slick pace, foxtrot, rack or other deviation from

the true walk are not acceptable in a Tennessee Walking Horse class. The preceding mannerisms are not considered in good form and should be penalized.

D) PRESENTATION

1) All entries should be presented clean, neatly trimmed and in good flesh to present a healthy appearance.

2) Each entry should be presented in appropriate clean tack for the class entered. The exhibitor of each entry should also be neat in appearance and appropriately attired with proper fitting habits, conducting themselves as ladies and gentlemen in a sportsmanlike manner at all times.

3) All classes shall be judged on overall performance, presentation and conformation except Model, which shall be judged on presentation and conformation alone.

4)

SECTION 11 - DESCRIPTION OF DIVISIONS

ii. Judges will evaluate the transitions between gaits. Transitions must be gradual and smooth.
